It is a pleasure to be able to present to you the broad selection of choice coins of Europe, Asia and Africa which is included in Part Two of the Parsons Collection. From this attractive and varied group of coins, you will find more than two hundred and eighty are illustrated by photographic plates. A listing of the outstanding pieces would be superfluous. Study the catalog and feast your eyes and your numismatic desires.

Part Three of the Parsons Collection will be offered a few weeks later. This will include coins of Spain, Spanish America, Latin America, the Caribbean and North America. To these will be added coins of the Philippines and Hawaii, as well as miscellaneous coins that could not be included in previous sales.

The Spanish American auction of the Parsons Collection will be supplemented by several outstanding groups of coins. Notable among these is a major collection of Santiago and Chile which includes a Coquimbo peso and a rich selection of the colonial bust type issues. Make sure you get a catalog.

HOW AN AUCTION SALE WORKS

Perhaps you have wondered just how my auction sales of coins really work. If you have, this is what happens.

A large collection or a group of small collections are consigned by their owners to be sold at the best prices possible. Then the coins are assembled in a reasonable order, making lots of one or more coins, as I determine the buyer will prefer. The lots are then catalogued and described, sensible valuations are established and photographs are made for some of the outstanding pieces and those which are impossible to describe satisfactorily with words alone. When mounted, the photographs are sent to the photo-engraver for the preparation of plates to be used by the printer. Several thousand catalogs are printed and mailed to prospective buyers. Each catalog has a BID SHEET for the buyer to use, along with a return envelope.

When the BID SHEETS are received they are numbered in the order of their receipt and the bids posted in a master BID BOOK. On the date of the sale, the BID BOOK is checked and the high bidder on each lot has his bid – **starting at a normal advance over the second high bid** – offered against the floor bidders at the public sale. In a case where equal bids are received, the first bidder wins the lot. Therefore it follows that a mail bidder will receive the lot if a floor bidder does not exceed his bid by the normal advance.

Valuations are estimates of the value of each lot. They are sometimes less than catalog values because of condition. Often they are the standard catalog. Frequently they are higher or much higher than catalog values because current markets for these particular pieces far exceed the values given in available reference works.

A final word – the offering of ridiculously low bids that are only 10% to 20% of the estimate of value is a waste of my time and the bidder's time. They can only result in no more catalogs being sent to such individuals. Life is too short to bother with this type.

Govern yourself accordingly, and do enjoy this great hobby.
